

Starting with 1925, among the German companies operating during the interwar in Romania is registered the EIBERSDORF & CO S.A.R as producer of toothpaste and various plasters, having as base a white rubber patch.

Continuing the production after nationalization is I.I. STALIN CITY, with production units in Brasov, on Str. Karl Marx no. 47.

In 1972, being the only producer of plasters, market requirements impose a development of production capacities.

To achieve this, I.P.C NIVEA BRASOV transfers its plaster manufacturing to the section it holds in BOD, 92 Ariujdului Street. A period for the modernization of manufacturing technology follows, the purchase of new and high-performance imported equipment between the years 1976-1978.

After 1990, I.P.C NIVEA changed its name to S.C. NORVEA S.A., keeping the production profile. In 1992, S.C. NORVEA S.A. participates in the formation of one of the first joint ventures with COLGATE PALMOLIVE, under the name of S.C. COLGATE PALMOLIVE ROMANIA SRL.

In 1994, S.C. MEBRA SRL BRASOV, a company with fully private capital, having as object of activity the continuation of the production of plasters, drugs, chemicals and cosmetics at the unit in Bod.

This production unit has been fully purchased, with production spaces, manufacturing technology, the working and specialized staff by SC MEBRA SRL BRASOV from SC COLGATE PALMOLIVE ROMANIA SRL.

After 1998 and until now, SC MEBRA SRL carries out an extensive program for the modernization of production spaces, technological flows and environmental conditions in accordance with the rules of Good Manufacturing Practice of Products.

The company's headquarters and the warehouse of finished products are located in Brasov.

Obtaining, in 2004, the GMP Certificate for drug production, and in 2005, the SRAC and IQNET certification of the integrated quality-environment management system according to the international standards ISO 9001 and ISO 14001, represents a confirmation of the quality of our products, as well as the high level of professional training of staff and endowment with production spaces, laboratories and warehouses organized on manufacturing flows and fulfilling all the conditions of drug production, cosmetics and medical devices.

These certificates give extra confidence to our products, a guarantee that they are made and controlled in manufacturing and analysis conditions imposed by the regulations in force.

Our product portfolio includes products dedicated to the market, already well known to consumers, but also new products and product ranges, made at a very good quality and affordable prices, which will continue to convince anyone that our permanent concern is to meet consumer requirements.

The main brand, which enjoys the unanimous appreciation of customers is **OXIMED**, associated with the qualities of the drug in the form of spray used against burns and other dermatological conditions.

The **MEDPLAST** brand is the most famous on the Romanian market, in the field of plasters and adhesive tapes (medical devices).

The ranges of dermato-cosmetic products **TONIFOR**, **ERITROACNOL**, **MEBRA**, **MEDARA** are enriched with new products for body and skin care, following the trends on the market in this field.

Powders made by us are superlatively appreciated by customers. Because our permanent care is customer satisfaction, all of the above products are dermatologically and in terms of skin tolerance. A special category of products is the **MEDBAND** range of adhesive tapes used in industry.

# OXIMED

## CUTANEOUS SPRAY 59.5G

For sunburn / thermal burns, dermatitis and skin infections.

Oximed spray is recommended for:

- > burns
- > superinfected dermatoses including atopic eczema
- > superinfected dermatitis
- > cutting-out lesions
- > infected wounds
- > crural ulcers

The product is applied easily, without touching the wound, being in the form of a spray.

Burns facilitate the appearance of infections as a result of destroying the skin barrier.

Bacteria and fungi most often contaminate burned wounds.

To prevent infection of burns, it is recommended the immediate use of antimicrobial drugs with external use, such as OXIMED spray, which aim to reduce the microbial load on the burned wounds.

It is recommended to apply the antibiotic spray OXIMED to prevent infection and to heal the burns quickly, this being very useful in sunburn that covers a large surface of the skin. Its unique composition on the Romanian market acts quickly and efficiently, preventing infection of burns and wounds due to the combination of antibiotics: oxytetracycline hydrochloride and corticosteroid: hydrocortisone

**Oxytetracycline works by interfering with the ability of bacteria to produce essential proteins.**

**Without these proteins, bacteria cannot multiply. Therefore, oxytetracycline stops the spread of the infection. Hydrocortisone works by reducing inflammation of the skin and reduces the sensation of local pain.**

Oximed spray helps cool the contact place, decreases the feeling of discomfort and forms a protective barrier on the skin due to the myristate of isopropyl and prevents infection of the wound.

# LEAFLET

## OXIMED

### MARKETING AUTHORIZATION NO 5285/2005/01

### OXIMED

#### Cutaneous spray, suspension

#### Composition

A vial with cutaneous spray, suspension contains oxytetracycline hydrochloride 0.255g, hydrocortisone 0.085g and excipients: sorbitan trioleate, isopropyl myristate, norflurane.

Pharmacotherapeutic group: dermatological products; corticosteroids with weak potency in combination with antibiotics

#### Therapeutic indications

Dermatoses: over infected exudative eczema including:

- atopic eczema,
- eczema-like dermatitis,
- allergic and seborrheic dermatitis,
- disseminated or circumscribed neurodermatitis,
- pruritus

#### Contraindications

Hypersensitivity to any of the product components. Tuberculous, fungal, viral lesions (herpes simplex, varicella vaccinia). Primary bacterial infections (e.g. impetigo, pyoderma, furunculosis). Pregnancy and breastfeeding.

#### Precautions

When applied to the face area, appropriate measures to protect the nose and eyes are recommended to avoid inhalation and administration on the conjunctival mucosa.

The duration of treatment should not exceed 7 days if no improvement in symptoms is observed, as this situation may be given by the occult extension of the masked glucocorticoid infection.

The possible appearance of strains resistant to oxytetracycline or fungal superinfection is monitored. Prolonged or repeated application should be avoided due to the risk of awareness. Glucocorticoid absorption may be increased if used in large areas or under an occlusive band aid; in this case the possibility of systemic effects should be considered.

If hypersensitivity occurs, administration should be discontinued.

#### Interactions

Not known.

#### Special warnings

Like other tetracyclines, oxytetracycline is generally ineffective in infections caused by *Pseudomonas Spp.* and *Proteus Spp.*

Because these microorganisms are recognized as secondary to exudative lesions in dermatoses, it is necessary to identify the microorganisms involved and the sensitivity to antibiotics in advance.

Because the degree of absorption after topical administration of tetracycline is unknown, it is not recommended to administer on surfaces stretched in children up to 8 years (due to the theoretical risk of permanent dentition).

#### Pregnancy and breastfeeding

Oximed is contraindicated during pregnancy and lactation (due to the theoretical risk of permanent dentition due to the presence of oxytetracycline)

Effects on ability to drive or use Oximed machines do not affect the ability to drive or use machines.

#### Doses and method of administration

Oximed is sprayed (after shaking the vial) for 2-3 seconds in the treated area, from a distance of 15 cm. Oximed is applied after prior cleansing of the skin, when possible.

The administration is repeated 2-4 times a day. Oximed is only used for topical administration.

#### Side effects

Oximed may cause hypersensitivity reactions, including contact dermatitis.

Other local side effects that have been reported with topical glucocorticoids, especially under the exclusive dressing, are: burning sensation, itching, irritation, dry skin, folliculitis, hypertrichosis, acneiform rash, atrophy of the skin, secondary infections, stretch marks.

#### Overdose

No cases of overdose have been reported.

#### Keeping

Do not use after the expiry date which is stated on the carton.

Store below 25°C.

Keep out of the reach and sight of children. Pressure container: must not be exposed to the sun and temperatures exceeding 50°C.

#### Packaging

Box with a pressurized vial of 59.5g skin spray suspension.

# MEBRA<sup>®</sup>

## CREAM WITH VITAMIN A

45ML/50ML/100ML

Product for the maintenance of dry, atones and / or flaky skin. High Vitamin A content (Retinol) improves the appearance and texture of the skin by counteracting the aging effect, improving the epithelial and elasticity of the skin.

The cream also contains cholesterol, the essential substance of the skin, being one of the 3 physiological lipids of the stratum corneum of the skin, which supports the moisture balance of the skin, which supports the moisture balance of the skin and prevents dehydration.

It is specially designed to restore the protective barrier of the skin and combat the sensation of dry skin.

**Vitamin A (Retinolul)** from Mebra cream is a key ingredient for skin care with proven effects:

- improves the appearance and texture of the skin
- improves skin epithelialization and elasticity
- promotes natural hydration of the skin
- helps maintain a healthy dermis and epidermis
- stimulates collagen production to reduce fine lines and wrinkles
- stimulates cellular renewal of the skin

The cream also contains cholesterol, the essential substance of the skin, being one of the 3 physiological lipids of the stratum corneum of the skin.

**Vitamin A (Retinol)** from Medara cream is a key ingredient for skin care.

**Vitamin E** moisturizes the skin and fights free radicals, thus preventing premature aging of the skin.

**Cholesterol** the essential substance of the skin, supports the moisture balance of the skin and prevents dehydration.

**Lanoline** has an excellent ability to absorb and maintain hydration.

# MEDARA<sup>®</sup>

## MOISTURIZER SKIN CREAM WITH VITAMIN A AND E 45ML

It is specially designed to restore the protective barrier of the skin and combat the sensation of dry skin.

Very useful cream, recommended:

- winter for the dry skin
- for recovery after chemical treatments and aggressive exfoliation
- for mature or very dry skin

## eritroacnol<sup>®</sup> ANTIACNE CREAM 75ML

- The cream is useful for dehydrated skin after hard antifreeze treatments
- Soothes and cares for oily skin, with an acne tendency
- Herbal extracts from the cream composition help regulate excess sebum and have astringent and calming effects

Eritroacnol cream contains plant extracts beneficial for oily skin.

**Calendula** has antioxidant, antibacterial, anti-inflammatory, sebum-adjusting properties in the skin, helping to improve the condition of the skin susceptible to acne.

**Echinacea** also known as purple chamomile extract, has anti-inflammatory and antioxidant properties and can be an adjunct in the improvement of pimples, bacterial infections.

## eritroacnol<sup>®</sup> ANTIACNE GEL 75ML

- The gel is specially designed to reduce the sensation of oily skin and to soothe over-sebum skin, susceptible to acne.
- The gel is very useful for oily skin with an acne tendency due to the content of salicylic acid and flat extracts with astringent and calming effects.

**Salicylic acid** in Eritroacnol gel is a key ingredient for skin care with proven effects:

- cleaning of blocked pores (by breaking the bonds between dead skin cells so that they can be released from pores more easily);
- reducing the production of sebum on the skin and reducing the number of eruptions;
- has a light exfoliation effect.

Eritroacnol gel also contains plant extracts beneficial for oily skin.

**Calendula** has antioxidant, antibacterial, anti-inflammatory, sebum-adjusting properties in the skin, helping to improve the condition of the skin susceptible to acne.

**Echinacea** also known as purple chamomile extract, has anti-inflammatory and antioxidant properties and can be an adjunct in the improvement of pimples, bacterial infections.

**Salvia Officinalis** with proven astringent effect - due to the content of ursolic acid it exfoliates and deeply cleanses the skin and prevents the proliferation of bacteria.

**Retinol** is an antioxidant, reduces the formation of free radicals and helps improve skin texture.

**Vitamin E** has an antioxidant effect.

## eritroacnol<sup>®</sup> ANTIACNE LOTION 75ML

- efficiency for cleaning oily skin, with an acne tendency
- purifies and gives a feeling of freshness
- reduces the feeling of oily skin
- calms and clean the pores due to the content of salicylic acid

**Salicylic acid** in Eritroacnol lotion is a key ingredient for skin care with proven effects:

- cleaning of blocked pores (by breaking the bonds in the dead skin cells so that they can be released from the pores more easily)
- decrease in sebum production on the skin and reduction in the number of eruptions
- has a light exfoliation effect.

**Calendula** has antioxidant, antibacterial, anti-inflammatory, sebum-adjusting properties in the skin, helping to improve the condition of the skin susceptible to acne.

**Echinacea** also known as purple chamomile extract, has anti-inflammatory and antioxidant properties and can be an adjunct in the improvement of pimples, bacterial infections.

**Salvia Officinalis** with proven astringent effect - due to the content of ursolic acid it exfoliates and deeply cleanses the skin and prevents the proliferation of bacteria.

## TONIFOR<sup>®</sup> TONIC AND RELAXING CREAM 75ML

TONIFOR cream contains ingredients traditionally used in cosmetics: arnica, camphor, sea buckthorn and spearmint oils have beneficial properties on relaxing skin, stimulating peripheral blood circulation, antibacterial, vitaminizing.

- is a natural adjuvant for muscle discomfort due to prolonged effort
- its main ingredients: arnica extract, camphor, sea buckthorn oil and spearmint oil give beneficial properties on the skin: relaxing, stimulating peripheral blood circulation, vitaminizing, reducing the feeling of discomfort of the muscles and joints
- does not contain preservatives or artificial dyes or perfumes
- due to natural ingredients, it can be used in the long run, without side effects
- does not contain preservatives or artificial dyes or perfumes
- due to natural ingredients, it can be used long term, without side effects

The main ingredient of Tonifor tonic and relaxing cream is **arnica extract**, a medicinal plant used in human natural medicine due to its anti-inflammatory action, and the literature describes the antirheumatic effect of arnica extract. Another ingredient in Tonifor tonic and relaxing cream is **camphor oil** - a common ingredient in painkillers, including topical painkillers. It can help treat muscle pain, while stimulating circulation, by interacting with receptors on the sensory nerves. Camphor oil can also help reduce chronic muscle and joint pain over longer periods.

**The essential oil of the spearmint**, ingredient of the product TONIFOR cream known due to the cooling effect on the swollen and with itching skin to help reduce the sensations of inflammation.

And the sea buckthorn oil in the composition of the product vitaminizes and tones the skin.

## TONIFOR<sup>®</sup> ARNICA GEL 75ML

Arnica, a plant traditionally used for cosmetics, is a skin relaxant, has an anti-inflammatory effect, stimulates peripheral blood circulation to the massaged skin.

Tonifor arnica gel is a herbal gel with a tonic effect, with a high concentration of arnica extract, which due to the texture of the gel leaves a pleasant and refreshing sensation after application.

### Tonifor arnica gel

- is a natural adjuvant for muscle discomfort due to prolonged effort
- its main ingredients: arnica extract and camphor have relaxing effects, stimulate circulation and reduce discomfort in muscles and joints
- does not contain preservatives or artificial dyes or perfumes
- non-greasy, absorbs quickly and completely - leaves no traces
- thanks to the natural ingredients, it can be used in the long term, without adverse effects

The main ingredient of TONIFOR ARNICA GEL is **arnica extract** in a concentration of over 20%, a medicinal plant used in human natural medicine due to its anti-inflammatory action.

Another ingredient in TONIFOR ARNICA GEL is **camphor oil** - a common ingredient in painkillers, including topical analgesics. It can help treat muscle pain, while stimulating circulation, by interacting with receptors on the sensory nerves.

They are incorporated in a gel formula for easy application with a refreshing effect.

## TONIFOR<sup>®</sup> TONIC LOTION 100ML

It is a product with a very high concentration of mountain arnica tincture.

- is a natural adjuvant for muscle discomfort due to prolonged effort or other causes
- its main ingredients: arnica extract and menthol have a relaxing effect and are adjuvants in reducing discomfort in the muscles and joints
- does not contain preservatives or artificial dyes or perfumes
- recommended in case of flu or after prolonged effort
- due to natural ingredients, it can be used in the long term, without side effects

Tonifor lotion is a **pure formula of arnica extract in alcohol**, obtained in own laboratories, with easy application due to the dosing pump.

The product contains **99% mountain arnica tincture**.

Arnica is a medicinal plant used in human natural medicine due to its anti-inflammatory action.

Another ingredient of TONIFOR LOTION is **menthol**, with a refreshing and calming effect.

## MEBRA®

### DEVIL'S CLAW CREAM 45ML

The devil's claw, hot peppers and camphor are astringent, tonic, activates blood circulation.

Propolis and vitamin A have beneficial effects on the skin.

One of the main characteristics is the adjuvant effect in relieving joint and bone pain. Being a product based on natural components, it can be used in the long term.

The main ingredients of the product, of natural origin with beneficial effect are:

**The glycolic extract of the devil's claw** helps to reduce the intensity and frequency of joint pain, helps maintain the normal functioning of the joints, supports the mechanisms of protection against oxidative stress.

**Standardized propolis extract** contains a component called pinocembrin, which acts as an antifungal for humans. The antifungal, anti-inflammatory and antimicrobial properties of propolis help heal wounds, burns or other traumas, as it potentiates cellular replication and tissue recovery. In addition, propolis has the ability to strengthen the cell wall. It gives skin tone and helps repair it, especially sensitive skin or with certain conditions, eczema, burns or wounds. Its antibacterial and anti-inflammatory effect also functions as a local treatment.

Glycolic hot pepper extract - effectively reduces pain levels, is very useful in rheumatic diseases.

**The camphor** prevents water loss from the epidermis, making it firmer. It is rich in unsaturated fats, but also in antioxidants, phytosterols, carotenoids and vitamins E and K, all having protective effects on the skin and stimulating cellular renewal. Effective against rheumatism.

## MEBRA®

### COMFREY CREAM 45 ML

COMFREY (due to the allantoin contained), marigolds, sea buckthorn and vitamin A, traditionally used in cosmetics, are calming and stimulates cell regeneration, are re-epithelializing, restructuring.

Helps protect the skin, is calming and stimulates cell regeneration.

Especially useful as an adjunct for swelling, bruising and adjuvant in joint discomfort.

**Benefits of ingredients used:**

**Comfrey glycolic extract** helps grow new skin cells along with other substances that reduce inflammation and keep the skin healthy.

Sea buckthorn oil is rich in various vitamins, minerals and beneficial plant compounds, it is naturally full of antioxidants. Sea buckthorn oil is rich in Omega fatty acids, phytosterols, carotenoids and E and K vitamins all having protective effects on the skin and stimulating cell renewal. Sea buckthorn oil enters the skin cells and prevents water loss from the epidermis, so the skin remains elastic and nourished properly.

**Marigold glycolic extract** has a healing and antiseptic effect, promoting healing and stimulating cell repair.

**Cholesterol** is one of the ingredients known as emollients. Their main goal is to maintain skin moisture. Dehydration is what reduces the suppleness and fineness of the skin and determines a dry, scaly consistency of it. Emollients are chemicals substances that cover the skin and prevent moisture loss.

**Vitamin A** is one of the most effective vitamins, as it acts in deeply, in the nucleus of skin cells. Controls sebum levels, reduces inflammation in the skin. Retinol (active form of vitamin A) has the ability to stimulate collagen and elastin production, but also restores the lipid barrier of the skin.

# MEBRA®

## HEEL CARE CREAM 40ML

Helpful for cracked heels, with thick, rough and hardened skin.

- helps protect heels against dryness and cracks
- visibly reduces cracked heels
- helps restore moisture to support and protect the natural process of skin regeneration

Mebra heels cream contains an **optimal combination of ingredients** useful for softening, hydration and exfoliation of heels.

**Salicylic acid** is a keratolytic agent that induces the disaggregation of corneocytes in the upper stratum corneum, increasing the removal of the scales and softens the stratum corneum.

**Lactic acid** has a moisturizing effect on the skin, maintains the pH of the skin and has an exfoliation effect.

**Allantoin** is a powerful moisturizing ingredient that increases the water content of the skin and helps restore the normal function of the lipid barrier.

**Vaseline and lanolin** provide a sealing barrier that blocks moisture to help rehydrate dry skin.

# MEBRA®

## FEET LOTION 100 ML

**Salvia, triclosan, benzalkonium chloride** have an antimicrobial and deodorant effect. Sage is also antioxidant; it maintains the skin in good conditions. **Menthol** masks unwanted smells, it is pleasant, refreshing.

- specially developed for daily use, offers a feeling of comfort in the legs
- helps protect the foot from sweating and unpleasant smells
- revives tired legs, offering a feeling of cooling and a fresh scent
- tones and deodorizes the skin of the legs, removing the unpleasant smell and prevents the formation of perspiration
- prevents eczema

The Mebra feet lotion contains an **optimal combination of ingredients** useful for cooling the legs and reducing sweating:

**Sage tincture** - due to tannic acid, inhibits the activity of the sweat glands and reduces perspiration.

**Salvia** has an antimicrobial and antibacterial effect, reducing the number of bacteria on the surface of the skin.

**Menthol** offers a pleasant feeling of cooling, freshness and toning of the legs.

**Benzalkonium chloride** is a compound with antimicrobial properties and an effect against bacteria, fungi and viruses. It works by destroying the membranes of microbes leading to their elimination, thus preventing the formation of an unpleasant smell as a result of sweating the legs.

**Triclosan** is an organic compound that prevents the development of bacteria, acts as a disinfectant, preservative or antiseptic.

**Propylene glycol** is an effective moisturizing agent that prevents water loss through the skin, increases the permeability of active ingredients, has emollient and lubricating properties.

# MEBRA®

## TIRED LEGS BALM 75ML

**Ingredients traditionally used in cosmetics, arnica, camphor and menthol have a calming, comforting effect. The product revives tired legs, produces a pleasant, refreshing sensation.**

Foot care is as important as caring for the face. Despite being extremely solicited, they are often neglected.

**Standing up, long walk, sports, inadequate footwear or weight** are just some of the factors that can cause pain and discomfort.

**Heavy and tired legs are an unpleasant symptom that prevents the normal course of daily activities.** Beyond the diseases interconnected with chronic venous insufficiency which can be the basis of heavy and tired legs, the most common cause encountered is related to the lifestyle approached. Diet rich in salt and fat, obesity, sedentary lifestyle, smoking, to which can be added other factors such as heredity and hormonal changes, that lead to tired and heavy leg syndrome.

Also, water retention in the body can be the basis for the manifestation of symptoms of heavy and tired legs. In some cases, overloading the legs or wearing inappropriate footwear may promote discomfort to the lower limbs.

## MEBRA<sup>®</sup> FRUITY POWDER 75ML

Refreshing, soothing, antimicrobial.

- > absorbs and reduces sweating of the hands and feet
- > has antibacterial properties, useful in skin protection
- > has antifungal properties, avoiding the formation of mycoses and eczema in the hands and feet

## MEBRA<sup>®</sup> MINT POWDER 75ML

Refreshing, soothing, antimicrobial.

- > absorbs and reduces sweating of the hands and feet
- > has antibacterial properties, useful in skin protection
- > has antifungal properties, avoiding the formation of mycoses and eczema in the hands and feet

## MEBRA<sup>®</sup> MINT POWDER AGAINST SWEAT 75ML

Absorbs and reduces sweating of the hands and feet

- > has antibacterial properties, useful in skin protection
- > has antifungal properties, avoiding the formation of mycoses and eczema in the hands and feet

## MEBRA<sup>®</sup> PROPOLIS POWDER 75ML

The product protects the skin due to the propolis extract.

- > has regenerating and antibacterial properties
- > protects the skin, being effective in absorbing excess moisture
- > the content of standardized propolis extract contributes to the antimicrobial effect
- > has a calming effect, removing the sensations of itching

# MEBRA®

## BABY POWDER WITH ORANGES AND SEA BUCKTHORN OIL 75G

Protects the skin and absorbs excess moisture to prevent irritation.

It is an essential product for **cleaning, calming and protecting children's sensitive skin.**

Azulene from the yarrow, sea buckthorn and orange oils and allantoin have calming, relaxing, regenerating, antimicrobial and protective properties, beneficial to the children's sensitive skin.

- protects the skin and absorbs excess moisture to prevent irritation
- is essential for cleaning the soothing and protecting children's skin
- forms a barrier to protect the skin, respecting the sensitive epidermis

### Ingredient benefits:

- **Zinc oxide** has the property of soothing inflammation and skin irritation, helping even to restore the epidermis faster and avoid the appearance of skin redness. It has antiseptic properties; therefore, it has the ability to reduce bacterial or fungal proliferation in the skin. In fact, it also forms a skin protection barrier, thus reducing the degree of moisture. One of the best solar porcelain ingredients blocks both UVA and UVB rays that are responsible for producing burns and skin lesions.
- **Allantoin** is an active ingredient with special properties: soothing, moisturizing, anti-irritating and anti-inflammatory, healing and re-epithelizing; helps cell renewal. Through the gentle keratolytic effect, helps to remove dead cells, and contributes to a good re-epithelialization of the affected areas. It has an emollient effect, and this quality makes it useful in products intended for irritated, rough and dry skin.
- **Sea buckthorn oil** prevents water loss from the epidermis and is a source of natural vitamins. It is rich in unsaturated fats, but also in antioxidants, phytosterols, carotenoids and vitamins E and K, all having protective effects on the skin and stimulating cellular renewal. Sea buckthorn oil is also rich in palmitoleic acid, which is a type of fat found naturally in human skin, which can be used to treat burns and to stimulate wound healing
- **Sweet orange essential oil** improves microcirculation which makes it particularly useful to promote skin health. Orange essential oil has an antioxidant, antifungal effect, can stimulate collagen production and reduce anxiety levels due to its flavour.
- **Yarrow tincture** calms the reddened and irritated skin. Due to the high azulene content (which represents almost half of the chemical composition of the plant), yarrow is a strong natural and useful anti-inflammatory in first aid treatment for scratches and superficial abrasions.

# MEBRA®

## VITAMIZING BABY OIL 150ML

Product designed for complete care of the children's skin due to the content of vitamins and sea buckthorn oil. Mebra vitaminizing oil gently moisturizes the skin and contains many valuable nutritional ingredients that allow the formation of a protective barrier that comes from the dehydration of the children's sensitive skin. It has a soothing effect due to the content of sweet orange essential oil.

- helps to take full care of the baby's skin
- gently moisturizes the skin and contains many valuable nutrients
- allows the formation of a protective barrier that prevents dehydration of the child's sensitive skin
- is soothing due to the content of sweet orange essential oil

### Benefits of ingredients:

Sea buckthorn oil prevents water loss from the epidermis and is a source of natural vitamins. It is rich in unsaturated fats, but also in antioxidants, phytosterols, carotenoids and vitamins E and K, all having protective effects on the skin and stimulating cellular renewal. Sea buckthorn oil enters the skin cells and prevents water loss from the epidermis, so the skin remains elastic and nourished properly

Vitamin A helps speed up healing, to prevent rash and support the skin's immune system and promote natural hydration - which means that it helps to effectively moisturize sensitive skin and maintain a healthy dermis and epidermis.

Vitamin E is a fat-soluble vitamin that acts as an antioxidant, helping to protect cells. In body oils, vitamin E:

- Prevents the skin from losing moisture
- Protects cells from damage
- Soak the skin

Sweet orange essential oil improves microcirculation which makes it particularly useful for promoting skin health

- has antioxidant, antifungal effect
- stimulates collagen production
- reduces anxiety due to its aroma

## MEBRA® ANTISTRESS MASSAGE OIL 300ML

Due to the **essential oil content of lavender and ylang-ylang**, MEBRA anti-stress massage oil helps **reduce stress and anxiety**. The oil remains in contact more with the skin, keeping it hydrated and nourished for a longer period.

Unlike body lotions or creams, body oil **provides better hydration for the skin:**

- the oil remains in contact more with the skin, keeping it hydrated and fed for a longer period than a water-based lotion
- especially in winter, it is preferable to use a body oil, because the skin is more susceptible to dehydration
- softens and relaxes the body, releasing it from stress, stretches and absorbs quickly, leaving behind a soft skin
- stimulates the senses and gives a feeling of peace and balance
- helps reduce stress and anxiety

### Benefits of ingredients:

- **Lavender essential oil** is famous for its wonderful benefits on the skin, but also on the mental states of anxiety and stress; floral-hot aroma, soothing and relaxing is suitable for a comforting massage. The essential oil used has the highest quality standard, being in line with European Pharmacopoeia and a high percentage of active substances
- **Ylang-ylang essential oil** has anxiolytic and antidepressive effect, can reduce the excitability of the central nervous system, lowers pulse, blood pressure, has a beneficial effect in aromatherapy
- **Isopropyl myristate** is a non-fat, fluid emollient that contributes to skin hydration and better skin penetration of active ingredients
- **Menthol** gives a refreshing effect, stimulates and invigorates the body

## MEBRA® REVITALIZING MASSAGE OIL 300ML

Due to the content of **essential rosemary, pine and spearmint oil**, MEBRA REVITALIZING MASSAGE OIL has an energizing, invigorating and comforting effect. The oil remains in more contact with the skin, keeping it hydrated and fed for a longer period of time, and sea buckthorn oil vitaminizes the skin.

- **useful in states of weakness and fatigue**, adjuvant for relieving rheumatic pain or neuralgia, in flu or as a general comfort
- the oil remains in contact more with the skin, keeping it hydrated and fed for a longer period than a water-based lotion especially in winter, it is better to use body oil instead of other lotions
- stimulates, energizes and revitalizes.
- Contains a mixture of essential oils beneficial for invigorating tired muscles after intense effort

### Benefits of the ingredients:

- **Spearmint oil** creates a refreshing effect, stimulates and invigorates the body
- **Camphor** is a precious ingredient due to the anti-inflammatory, analgesic, stimulating properties of blood circulation, antirheumatic. Camphor oil accelerates blood circulation and helps relief joint discomfort
- **Pine essential oil** has analgesic effects so it is a useful adjuvant for joint pain, for relieving the symptoms of arthritis and for treating rheumatic pain. Used in aromatherapy applications, pine essential oil has a positive impact on mood, cleansing the mind of stress, energizing the body to help eliminate fatigue, increasing concentration
- **Rosemary essential oil** - has one of the most invigorating flavours and a tonic and stimulating effect for the whole body. Stimulates blood circulation, detoxifies tense muscles and attenuates fluid retention
- **Sea buckthorn oil** - rich in various vitamins, minerals and beneficial plant compounds is naturally full of antioxidants. Sea buckthorn oil is rich in Omega fatty acids, phytosterols, carotenoids and E and K vitamins all having protective effects on the skin and stimulating cell renewal. Sea buckthorn oil enters the skin cells and prevents water loss from the epidermis, so the skin remains elastic and nourished properly.
- **Isopropyl myristate** is a non-fat, fluid emollient that contributes to skin hydration and better skin penetration of active ingredients
- **USE:** External use - apply on the skin, massage

# MEBRA®

## PROPOLIS AND MARIGOLD SPRAY 50ML

**Propolis and marigolds** are traditionally used in cosmetics for their antimicrobial effect and **cell renewal**.

- for faster healing and infection prevention
- contains propolis and marigold tincture
- practical format at 50ml, easy to transport
- easy application in the form of a spray
- natural and efficient product

### Benefits of ingredients:

**Propolis** is a resin produced by bees by the mixture of wax, pollen, salivary secretions and natural collected resins.

The exact composition of propolis varies depending on the source, and in propolis over 300 chemical components belonging to flavonoids, terpenes and phenolic acids have been identified.

Propolis and its compounds have been at the involve in many works due to their antimicrobial and anti-inflammatory activity.

Propolis also has regenerative properties.

**Calendula officinalis (marigold)** contains a large number of flavonoids.

Helps minimize inflammation and helps speed up the healing process.

# MEBRA®

## PROPOLIS AND YARROW SPRAY 50ML

**Propolis and yarrow** (which contains natural azulenes), are traditionally used in cosmetics for their antimicrobial, epithelizing, calming and tonic effect.

- for faster healing and infection prevention
- contains propolis tincture and yarrow tincture
- practical format at 50ml, easy to transport
- easy application in the form of a spray
- natural and efficient product

### Benefits of ingredients

**Propolis** is a resin produced by bees by the mixture of wax, pollen, salivary secretions and natural collected resins.

The exact composition of propolis varies depending on the source, and in propolis over 300 chemical components belonging to flavonoids, terpenes and phenolic acids have been identified.

Propolis and its compounds have been at the involve in many works due to their antimicrobial and anti-inflammatory activity.

Propolis also has regenerative properties.

**The yarrow** helps the wounds heal by encouraging blood coagulation. Its healing ability comes mainly from the achilleas alkaloid, a fact demonstrated in several studies.

**Azulenes**, represent almost half of the chemical composition of the plant, are a powerful natural anti-inflammatory, useful in the first aid treatment for scratches and superficial abrasions.

# MEDARA®

LOTION AGAINST HAIR LOST WITH  
QUININE AND PLANTS EXTRACT 200ML

The active principles contained have a regenerative action on devitalized hair, intensify blood circulation to the scalp.

They have beneficial effects on the hair and scalp - tonic, astringent, antioxidant, antimicrobial.

**MEBRA®**  
CREAM WITH  
CALENDULA 100 ML

Calendula traditionally used in cosmetics have a calming, antimicrobial, healing, toning, invigorating effect, relieves peripheral circulation.

**MEBRA®**  
CREAM WITH CHESTNUT  
EXTRACT 75ML

Chestnuts traditionally used in cosmetics have venous vasoconstrictor properties, reducing capillary fragility, toning the walls of the veins.

## SALVO-MEB SPRAY 30ML

With sage officinalis extract, honey, blue methylene, lemon essential oil, SALVO-MEB spray is recommended for the health of the neck and upper respiratory tract.

It is a dietary supplement for use in the pharynx and tonsils with emollient and ant irritant action.

### Benefits

- adjuvant for discomfort in the pharynx, larynx and tonsils
- calming effect
- maintains the health of the neck and upper respiratory tract
- easy application in the affected area due to the dosing pump
- with methylene blue, sage tincture, honey and lemon essential oil - synergistic and useful combination for neck health

### SALVO-MEB ingredients moisturize and soothe irritated mucosa

- **Sage tincture** - treating sore throat and larynx, reduces the number of secretions. Relieves breathing by decongesting the larynx. It is a natural remedy for sore throat, accelerating healing.
- **Honey** is a unique natural product. According to the literature it has an excellent anti-inflammatory, antibacterial, analgesic and expectorant action
- **Glycerine** has emollient properties helping to eliminate the discomfort caused by neck irritations. It is recommended as an antiseptic of the oral cavity
- **Lemon essential oil** is known to be rich in vitamin C, antiviral and antibacterial, with calming properties. The literature also mentions the benefit of stimulating saliva production, which ensures better hydration of the neck, so that the irritated throat is no longer felt
- **Blue methylene** - quick remedy for sore throat or stinging with antimicrobial properties. Blue methylene also acts as an antiseptic, because when applied to the skin or various tissues, it reduces the risk of infection or superinfection.

## MEBRA® PROPOLIS TINCTURE 30% FOOD SUPPLEMENT 30 ML

### Recommendations:

- fatigue and exhaustion
- low immunity
- radiation exposure

### Action:

- contributes to increasing physical endurance and removing fatigue
- helps to tone the capillaries and regenerate tissues by stimulating collagen biosynthesis
- determines the increase of the general resistance of the body by stimulating specific and non-specific immune factors
- contributes to protect the body against free radicals and the harmful effects of radiation

Ingredients: 30% natural propolis, 70% hydro-alcoholic solution

**100% natural!**

## MEBRA<sup>®</sup> EYEGASSES SOLUTION 50 ML

It is a medical device.  
Prevents steaming, cleansing and protecting the lenses.  
Registered at the Ministry of Health.

### Use:

Apply in a thin layer; after a few seconds wipe with a microfibre handkerchief.

### Precautions:

Avoid contact with eyes.

## MEBRA<sup>®</sup> HAND CLEANING SOLUTION 100ML

Alcohol 80% - Sanitizes and protects the skin

- > does not require the use of water and soap, being ideal for hygienic hand cleaning when this is not possible
- > Formula according to OMS recommendation, with quick drying
- > Does not contain dyes!
- > Tested tolerance!

### Composition:

Denatured alcohol, Aqua, Glycerin, Hydrogen peroxide

### Utilization:

Use a sufficient amount of solution and massage your hands until dry

## MEBRA<sup>®</sup> GEL FOR ECOGRAPHIES 500 ML

Medical device. Product intended for delimitation and protection of areas subject to ultrasound investigation.  
Registered at the Ministry of Health.

### Use

Applies on the surface to be examined by ultrasound

**Dermatological tested product.**

## MEDPLAST<sup>®</sup> 206 M DRESSING (2\*6)CM 20 PCS.

Made of adhesive patch on which it is applied a strip soaked with rivanol solution. Used for dressing small wounds, it has a strong antimicrobial and anti-mycotic action due to the rivanol.

### Recommendations:

Rivanol-impregnated dressing - antiseptic substance - provides microbial protection of superficial wounds.

The wound and the area around it are cleaned, disinfected and dried carefully.

Apply the dressing with rivanol.

Repeat the operation at least twice a day.

It is an **antiseptic, adhesive, resistant, nonallergic, aerated product.**

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 1252 M DRESSING (10\*6)CM / 20 PCS.

Made of adhesive patch on which it is applied a strip soaked with rivanol solution. Used for dressing small wounds, it has a strong antimicrobial and anti-mycotic action due to the rivanol.

### Recommendations:

Rivanol-impregnated dressing - antiseptic substance - provides microbial protection of superficial wounds.

The wound and the area around it are cleaned, disinfected and dried carefully.

Apply the dressing with rivanol.

Repeat the operation at least twice a day.

It is an **antiseptic, adhesive, resistant, nonallergic, aerated product.**

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 405 M BAND DRESSING FOR CUTTING (40\*5)CM

Made of adhesive patch on which is applied a strip soaked with rivanol solution. Used for dressing small wounds, it has strong antimicrobial and anti-mycotic action due to the rivanol.

### Recommendations:

Rivanol-impregnated dressing - antiseptic substance - provides microbial protection of superficial wounds.

The wound and the area around it are cleaned, disinfected and dried carefully.

Apply the dressing with rivanol.

Repeat the operation at least twice a day.

It is an **antiseptic, adhesive, resistant, nonallergic, aerated product.**

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 1503 S ADHESIVE BANDAGE (3CM\*1.25M)

Self-adhesive medical device, useful for fixing dressings, infusions, probes.

It is a non-irritating, nonallergic product.

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 524 ADHESIVE BANDAGE (5CM\*5M)

Self-adhesive medical device, useful for fixing dressings, infusions, probes.

It is a non-irritating, nonallergic product.

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 515 ADHESIVE BANDAGE (1.5CM\*5M)

Self-adhesive medical device, useful for fixing dressings, infusions, probes.

It is a non-irritating, nonallergic product.

Dermatologically tested product.

Registered at the Ministry of Health.

## MEDPLAST<sup>®</sup> 2525 ADHESIVE BANDAGE (2.5CM\*2.5M)
